PROFESSIONAL SUMMARY

B.Tech CSE student at Graphic Era University with experience in building practical software projects for solving real-world problems through technology. Skilled in Java, JavaScript and backend development with strong foundation in DSA, OOP and core subjects. Interested in developing scalable and user-focused applications through hands on project experience.

EDUCATION

Year	Degree / Exam	Institute	Score
Aug 2023 – Present	B.Tech in Computer Science	Graphic Era University, Dehradun	7.5/10
2022	Class XII – C.B.S.E	Baluni Public School, Kotdwar	75.00%
2020	Class X – C.B.S.E	The Daffodils School, Kotdwar	80.00%

PROJECTS

On-Demand Home Services Platform | Jan-May 2026

Stack: React.js · Node.js · Express.js · PostgreSQL · Socket.io · Tailwind CSS · JWT

- Developed a full-stack on-demand home services featuring role-based authentication for Customer, Provider, and Admin roles.
- Implemented real-time booking status updates using Socket.io, enabling instant synchronisation booking requests and service status updates in real time.
- Designed and built an end-to-end booking workflow with APIs, provider availability management, a dynamic service catalogue, and a customer review system that auto-updates provider ratings.

CampusFind – AI-Based Lost & Found System | June-Aug 2025

Stack: Flask, Python, OpenCV, Scikit-learn, HTML, CSS, Bootstrap

- Built a centralised lost & found platform with real-time request tracking and AI-driven text/image matching capabilities.
- Implemented item matching using TF-IDF, cosine similarity, and OpenCV-based image processing to improve matching accuracy.
- Developed responsive frontend interfaces and backend workflows for authentication, item management, and secure request approval.

Smart Campus Communication System | Aug – Nov 2025

Stack: Java, Socket Programming, Java Swing, Multithreading, TCP/IP

- Developed a LAN-based real-time communication platform enabling secure multi-user messaging and campus-wide announcement broadcasting.
- Implemented client-server architecture using Java TCP sockets with multithreading to support concurrent user connections efficiently.
- Integrated file sharing and notification features to improve collaboration and communication between users.

TECHNICAL SKILLS

Frontend: React.js, HTML, CSS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST API Development, Socket.io

Databases: MongoDB, MySQL, PostgreSQL,

Core Concepts: DSA, OOP, DBMS, Computer Networks, Socket Programming, TCP/IP

Tools: Git, GitHub, VS Code, Postman

Languages: Java, C++, Python, JavaScript, C

CERTIFICATIONS

AWS Cloud Practitioner Essentials — Amazon Web Services | December 2025

Generative AI: Introduction and Applications — IBM Online | November 2025

Supervised Machine Learning — Stanford Online | Feb 2026

Computer Networks Fundamentals — Cisco Networking Academy | May 2025
